## PMCT-HD - TRIANGULAR HEAVY DUTY STROKE BELT SANDER AND POLISHER

Triangular Heavy Duty Stroke Belt Sander and Polisher models are built around a all welded structure, for a long lasting durability.

### CHARACTERISTICS & OPERATION

- Triangular Heavy Duty Stroke Belt Sanders and Polishers PMCT-HD and PMCT-HD-2 have feature dust hoods on both sides, a table with steel rollers and virtually wear-free balanced and quiet running aluminum pulleys. All models are equipped with a magnetic starter (overload protection), pneumatic belt tensioner and belt guards.
- The triangular shape allows better visibility on parts, better heat dissipation and belt saving. Table is covered with Russian cherrywood plywood. Motorized vertical table with 25" vertical adjustment. Total weight capacity is 1000 lb.
- These Sanders/Polishers are ideal for hirlining, graining, to sand weld seams, for Polishing and to obtain a good mill finish.
- Three models are available in Dual Belt, which allows the user to operate with two different grits at one time.

### OPTIONS & SPECIFICATIONS

- Enlarge the table from 30" to 48" / Contact Wheel Assembly with carriage;
- Variable speed from 3300 to 6300 fpm for a 5 HP Motor;
- Variable speed from 3300 to 6300 fpm for a 7.5 HP Motor;
- 6 Vacuum cups to hold parts fixed to the table;
- Polishing buffer wheel with linear rail with or without oscillating movement 1/2" stroke.

**MAABOX** - The multi-axis arm for enclosure box allows to rotate parts on every side easily and quickly.

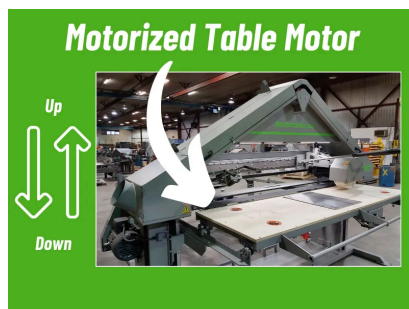

**MAABOX 3 AXIS**

MAABOX: 3 AXIS ROTATION

**Vacuum  
Cups**

SIX (6) VACUUM CUPS TO HOLD PARTS

**Motorized Table Motor**
