

TRM-180 MANUAL BARREL TURNER

The TRM-180 Barrel Turner is a manual version of the Barrel Turner with two non-motorized roller conveyors or two transfer ball tables nested into a cylindrical enclosure that rotates on its own axis. The system features powered rotation of the assembly, but the infeed and outfeed of the panel are done manually by the users.

STANDARD FEATURES

- Panel capacity up to 4' x 12'
- Maximum weight of panel 1000lbs
- Powered rotation
- "C" Shaped Cylindrical enclosure to facilitate manual pushing of the part
- Push button operating console
- Pneumatic hold down to maintain parts fixed during the rotation process
