

PINCH ROLLER Model PR

Our Pinch Rollers are specifically designed to help increase the surface to surface contact between the laminated products. The objective is to remove the trapped air in between the surfaces thus improving the adhesion.

Two models are available, model PR-51 with a capacity of 48" and model PR-63 with a capacity of 60". Both have solid top roller applying an even distribution of pressure, steel frame, safety stop fence and segmented bottom roller. Feed speed of 25 feet per minute.

The options are:

- Variable speed
- Reverse option
- Solid bottom roller
