The **Doucet Glue Conveyor** features a mild angle iron infeed conveyor, a stainless steel glue roller and a stainless steel angle iron outfeed conveyor.

20 inch Glue Conveyor

The basic model is 13 inches wide, with optional widths of 20" and 30". The infeed and outfeed conveyors are both 8 feet long and are expandable by adding 2 feet increments. The material feeding speed is set at 60 feet per minute and the reservoir can be removed for cleaning and maintenance.

| MODEL | STANDARD SIZE       | MOTOR                                     | FEED SPEED         | RESERVOIR                |
|-------|---------------------|---|--------------------|--------------------------|
| EC    | 13 INCHES X 16 FEET | 3/4 HP, 3 PHASE,<br>220, 440 OR 550 VOLTS | 60 FEET PER MINUTE | STAINLESS STEEL WITH LID |

| Other Available Features | CONVEYOR LENGTH                   | CONVEYOR WIDTH     | PRESSURE ROLLER | OVERHEAD RETURN           | GLUE PUMP |

|                          | EXTENSION IN<br>2 FEET INCREMENTS | 20 OR 30<br>INCHES | NON-MOTORIZED   | NON-MOTORIZED<br>CONVEYOR | ELECTRIC  |

Doucet has designed the **Plate Spreader** for the gluing of pieces such as stair treads and table tops. Using the spreader is a simple, yet effective way of applying adhesive to parts up to 4 feet long, in edge or face gluing application. After dipping the stainless steel grid into the glue reservoir, the adhesive is transferred to the material upon contact with the grid.

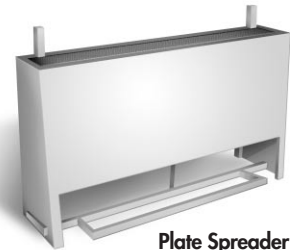

Plate Spreader

| MODEL | STANDARD SIZE        | RESERVOIR       | COVER    | GLUE TRANSFER GRID | DIPPING MECHANISM |
|-------|----------------------|-----------------|----------|--------------------|-------------------|
| BC    | 6 INCHES X 48 INCHES | STAINLESS STEEL | ALUMINUM | STAINLESS STEEL    | SPRING LOADED     |

The **Stock Gluer** is a table top motorized stainless steel roller equipped with a two litre capacity reservoir easily removable for clean up, definitely the most versatile and best value applicator on the market.
