

NWR CLAMP RACK

The NWR is a versatile Panel Clamp Rack designed to fill the panel assembly needs of the professional woodworker. Two models are available, a 6 and 8 foot rack than can be extended to match your length capacity requirements. The self-sanding structure can be erected either as a single frame places against a wall, or as a dual sided rack fitted with clamps on its front and back. Its unique cantilever arrangement with the clamps resting against two offset tubes, one on top and one in the bottom, ensures you to produce flat panels on a level plane. The two models can be expanded in 6 or 8 foot increments, up to 24 feet.

FEATURES AND SPECIFICATIONS
